

Infrastructure Assessment Solution

Maximise the potential of your Clarity installation.

Are you getting the most from your installation of Clarity? CQC Solutions are the leading Clarity consultants who offer a compelling combination of technical excellence in understanding Clarity, with the client-side experience and business insight to match your Clarity installation to your business aims.

CQC Solutions can offer a complete or targeted assessment of your Clarity systems installation to ensure your business is realising the maximum business and IT value from your investment in Clarity. Our assessment solutions can provide either:

- An assessment of the technical environment in which Clarity is running
- An analysis of your functional configuration to ensure that Clarity is set up to deliver in the way that is most effective.

CQC Solutions provide expert Project Portfolio Management (PPM) consultancy to a growing number of enterprise businesses across many vertical markets. Founded by five of the UK's leading PPM professionals, CQC are passionate about using best-in-class tools and common-sense best practices to help our clients derive maximum business and IT value from their PPM installation.

Based in Slough, with offices in London, CQC's team of 30 consultants are dedicated to maintaining the quality and integrity of our service.

As part of our business strategy to manage growth, our consultants are all trained extensively and carefully mentored by our senior management, to ensure our clients receive the highest possible levels of service delivery from CQC.

“Without exception the consultants at CQC Solutions have displayed all of the core qualities necessary in delivering a successful project - strong team, user engagement and in-depth knowledge”

Martin Cororan - Programme Manager, Symbian Software

CQC Infrastructure Assessment

This assessment is designed to review your technical infrastructure to ensure that your architecture is optimised for the most efficient and effective operation of your Clarity installation.

The assessment involves a review of your server, infrastructure and network environments by expert CQC Technical Consultants. This is designed to determine whether there are any identified or potential performance, scaling, business continuity or training issues inherent within your current Clarity installation.

As part of this assessment we will:

- Consider your future expansion plans and potential requirements
- Assess any additional alterations to your technical infrastructure that may be required to ensure you can scale accordingly
- Mitigate risks arising because of expansion within your Clarity installation.

The assessment documentation is then produced, which will contain the following:

- Documented audit of your **current Clarity environment(s)** with technical architecture definition
- Details of **future enhancements** to the infrastructure that may be required to meet your development plans.
