Outsource Assessment Solutions

Maximise the potential of your Clarity installation.

Are you getting the most from your installation of Clarity? CQC Solutions are the leading Clarity consultants who offer a compelling combination of technical excellence in understanding Clarity, with the client-side experience and business insight to match your Clarity installation to your business aims.

Outsource Assessment Solutions

CQC Solutions can offer a complete or targeted assessment of your Clarity systems installation to ensure your business is realising the maximum business and IT value from your investment in Clarity. Our assessment solutions can provide either:

● An assessment of the technical environment in which Clarity is running

● An analysis of your functional configuration to ensure that Clarity is set up to deliver in the way that is most effective.

CQC Solutions provide expert Project Portfolio Management (PPM) consultancy to a growing number of enterprise businesses across many vertical markets. Founded by five of the UK's leading PPM professionals, CQC are passionate about using best-in-class tools and common-sense best practices to help our clients derive maximum business and IT value from their PPM installation.

Based in Slough, with offices in London, CQC's team of 30 consultants are dedicated to maintaining the quality and integrity of our service.

As part of our business strategy to manage growth, our consultants are all trained extensively and carefully mentored by our senior management, to ensure our clients receive the highest possible levels of service delivery from CQC.

"Without exception the consultants at CQC Solutions have displayed all of the core qualities necessary in delivering a successful project - strong team, user engagement and in-depth knowledge"

Martin Cororan - Programme Manager, Symbian Software

CQC Outsource Assessment

This assessment reviews whether your current Clarity set-up is suitable to be migrated to a third-party supported environment, and highlights any areas of change and risk mitigation that are required before any migration can be implemented successfully.

● Review of your current server, infrastructure and network environments to determine suitability for migration to a third party supported environment.

This assessment is similar in nature to the **CQC Infrastructure Assessment**, but the emphasis is on benchmarking the current performance of your existing implementation. This enables us to monitor and control any performance improvement (or degradation) which occurs as a result of migration of your Clarity installation to an outsourced hosting provider.

The assessment documentation is then produced, which will contain the following:

● Documented **pre-migration benchmark review** of your current Clarity installation

● Our advice and recommendations for suitable **Service Level Agreements**

● **Other appropriate recommendations** for:
   ✿ suitable security access models
   ✿ increasing the overall robustness of the environment
   ✿ support model structure.
