

PPM Configuration Solutions

Optimise the configuration of your PPM installation.

Are you getting the most from your PPM installation ? CQC Solutions are a leading PPM consultancy with a vast experience of various PPM leading tools and our consultants offer a compelling combination of technical excellence in understanding your PPM tool, with the client-side experience and business insight to match your PPM installation with your business aims.

Optimised Configuration for your PPM systems

CQC Solutions offers a full range of configuration and technical solutions to meet your business needs and ensure that you derive the maximum benefit from your PPM installation.

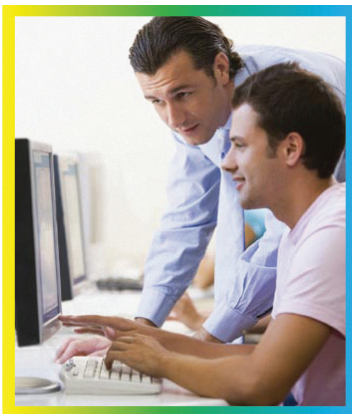

Project Portfolio and Business Process Management (BPM) solutions are investments that many businesses under-utilise. Many face challenges with user adoption. As practice leaders in this area, CQC offer effective and proven consultancy, training, support, development and customisation that will help you successfully adopt PPM technologies. As well as new solutions, we can successfully rescue and turnaround underperforming installations.

Based in London, but with clients world-wide, CQC's steadily growing team of consultants are renowned for their straightforward, pragmatic approach. Our team, are all extensively trained and are dedicated to maintaining the quality and integrity of CQC services.

We work for great clients, some of the biggest and most important international companies, such as Vodafone, Credit Suisse, Rio Tinto and Deutsche Bank.

“The successful implementation of the toolset was attributable to the excellent and continuous close support from experienced CQC Solutions personnel, working closely with the various internal analysts within the AIB Group.”

Kevin Hosey - Senior Manager, AIB Group

CQC PPM Implementation Solutions

- CQC's highly qualified and experienced consultants are able to **design, plan and implement** functionality and solutions that match your requirements and fit with your existing business processes
- To minimise the requirement on your own technical resources and leverage our expertise, CQC can take responsibility for your **entire PPM deployment**, including:
 - Software installation
 - Requirements capture and definition
 - Model office
 - User Acceptance Testing (UAT)
 - User training
 - “Go live” management
 - In-life support with bespoke service level agreements.

Our only requirement is a client-side sponsor or project manager to assist when required, and appropriate available resources to ensure that meaningful UAT can take place.

CQC Technical Solutions

At CQC we have the expertise and experience to ensure that your technical architecture is appropriate for your PPM installation, and to ensure that your PPM installation is configured to work effectively with your other enterprise technology investments.

CQC's highly skilled Technical Consultants can:

- Implement PPM effectively within your IT environment
- Design, plan and implement the integration of PPM to other ERP systems
- Create complex reports, dashboards and processes
- Create complex automation and web services

CQC Support & Training Solutions

- CQC Solutions offer a flexible range of bespoke Support Solutions which we can design and tailor to best fit your business requirements
- We also offer bespoke PPM Training Solutions that can enable you to perform normal ongoing in-life use within the client base.
